Airfield Response Kit (ARK)

The ARK consists of a 4 wheel drive utility vehicle and equipment to support logisticians operating in an airfield.

Kit Contents

- Generator
- Portable lighting
- Extension cords
- Fuel containers
- Safety equipment
- Canopy
- Folding tables/chairs
- Shovel
- Hot water kettle
- Tool kit

\$30,000 per kit.

Generator Kit

Generator kit includes a 230 voltage diesel generator used to power electrical equipment during disaster response operations.

Kit Contents

- 6500 watt generator
- Wheel kit
- Electrical plugs (Type D, J, and L)
- Extension cords
- Work light
- Spare bulbs
- Oil
- Hand tools

\$ 2,500 per kit.

Interagency Emergency Health Kit (IEHK)

Health kit designed for life-saving purposes in populations affected by emergencies with limited access to health care services. The IEHK fills immediate medical gaps and does not replace existing medical supply chain mechanisms. The kit contains pharmaceuticals, supplies, and equipment to support a defined number of people for a limited time.

One kit per 10,000 people for 3 months.

\$8,500 per kit.

Blankets

Heavy duty wool or synthetic, high thermal blankets that are fire retardant and meet ISO fire resistant ratings. The blankets measure 150cm x 200cm (60" x 80") and weigh approximately 4 lbs.

Two blankets per family of 5.

\$7.00 per blanket.

Plastic Sheeting

Plastic sheeting and tarpaulins for use in replacing damaged or destroyed walls and roofing, or to construct temporary shelters. The plastic is designed to meet basic shelter requirements and may last up to three years under normal field conditions. The material allows for adequate shade and temperature control in hot climates, but requires insulation in colder climates.

One roll per 50 people, or one tarpaulin per family of 5.

\$365 per roll.

Squatting plate

Squatting plates are plastic latrine slabs for first phase emergency set-up of family and communal latrines. These plates can be used in conjunction with latrine superstructures.

One plate per 50 people.

\$40 per plate.

Hygiene Kit Components

Hygiene supplies are packed in a tri-wall pallet. Components (unkitted) include the following:

Cotton Cloth – 100 x 400 x 100 cm cloth made of 100% absorbent brushed cotton material.

Antibacterial Soap – Bar of bath soap that is not harmful to the skin and does not contain pork fat.

Ultra Slim Hygienic Pads - Disposable sanitary pads for daily female hygiene.

Washing Powder - General purpose washing powder for hand and machine.

One kit per family of 5 per month.

\$12.50 per set of items.

Bucket with Lid and Tap

Two 14L buckets constructed food grade plastic and designed to be impact resistant. The bucket kit also includes two lids and a tap. Buckets are designed for water collection, transport, and storage at the household level.

Two buckets per family of 5.

\$3.00 per bucket.

Kitchen Set

Kitchen sets provide populations affected by emergencies with basic food preparation and service items. All items are made from either stainless steel, enameled metal, or food grade plastic.

Set Contents

- 1 x Cooking Pots
- 1 x Frying Pan
- 5 x Bowls
- 5 x Plates
- 5 x Cups
- 5 x Spoons
- 5 x Forks
- 5 x Knives
- 3 x Serving Ware
- 1 x Cleaning Pad

One set per family of 5.

\$25 per set.

Water Purification Tablets

33 mg and 67 mg tablets for family use, and 8.68g tablets for larger water containers.

Water tablets are added to drinking water to remove harmful micro-organisms. Tablets dissolve and disinfect water within 30 minutes.

Two 67 mg tablets or four 33 mg tablets per family/per day.

2¢ per tablet.

Water Containers - Collapsible

Collapsible water containers are designed for moving and storing potable water. The 10L containers are made from food grade plastic.

Two containers per family of 5.

\$1.50 per container.

Water Treatment Unit

The water treatment unit kit contains a lightweight pump, 30m³ settling tank, and other equipment designed for flocculation, sedimentation, and filling two 10m³ bladders for chlorination and storage. Based on a schedule of six hours for sedimentation and two hours for filling and emptying, this module could supply up to 60m³ per day.

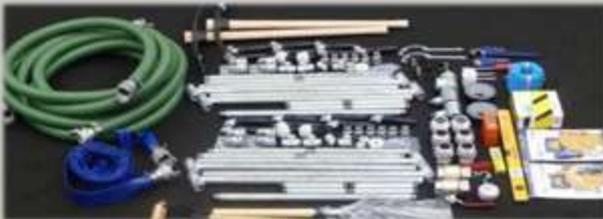

One unit supports 4,000 people per day.

\$13,500 per unit.

Water Bladder

Water bladders are made from polyester, coated with PVC and are suitable for drinking water storage. The tank is totally sealed and lies flat on the ground like a pillow. The bladder kit also contains tap stands, maintenance tools, and 30 ft. of semi-rigid water pipe.

\$3,000 per bladder.

Settling Tank Kit

The settling tank kit contains a 30m³ tank, steel framework, hoses, float, motor pump and maintenance kit.

\$10,500 per tank.
